TRIGO DETAILS

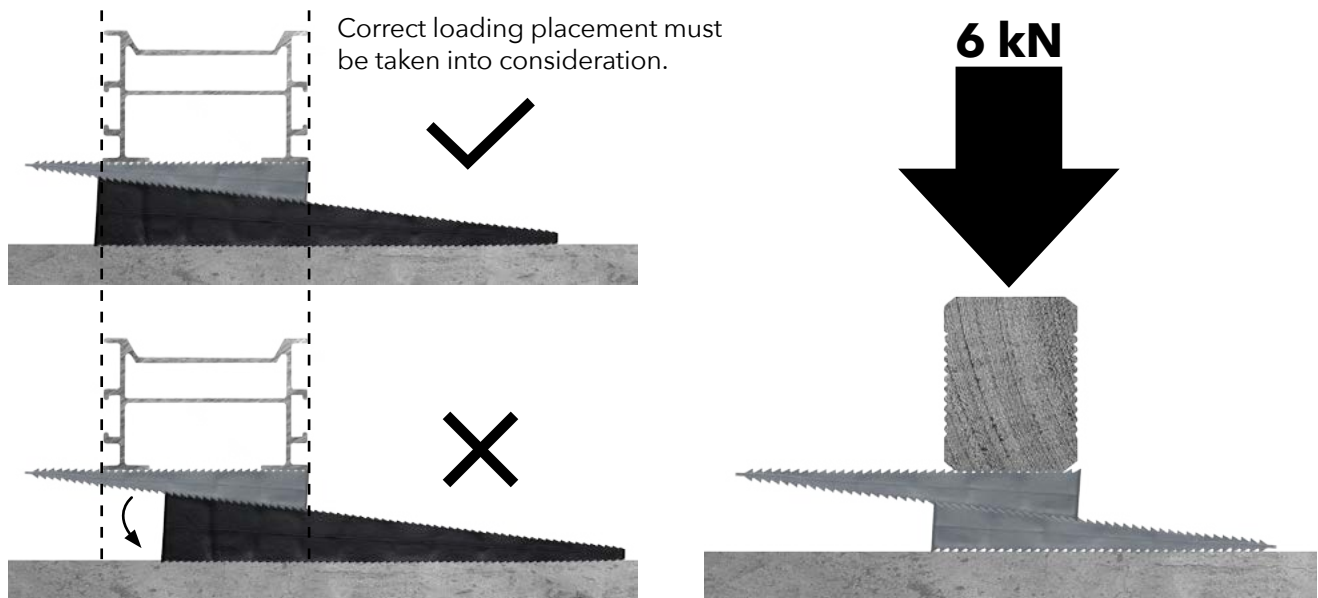

The wedge shape of the **TRIGO** adjustment wedges guarantees easy and quick set-up of terrace substructures made of wood, wood-like materials or aluminium.

Two adjustment wedges can compensate for differences in height from 14 mm to 40 mm.

The design of the staggered teeth ensures a non-slip and deformation-free connection.

Due to the special geometry and material selection a sound-absorbing effect is achieved.

The **TRIGO** adjustment wedges can be used and combined universally.

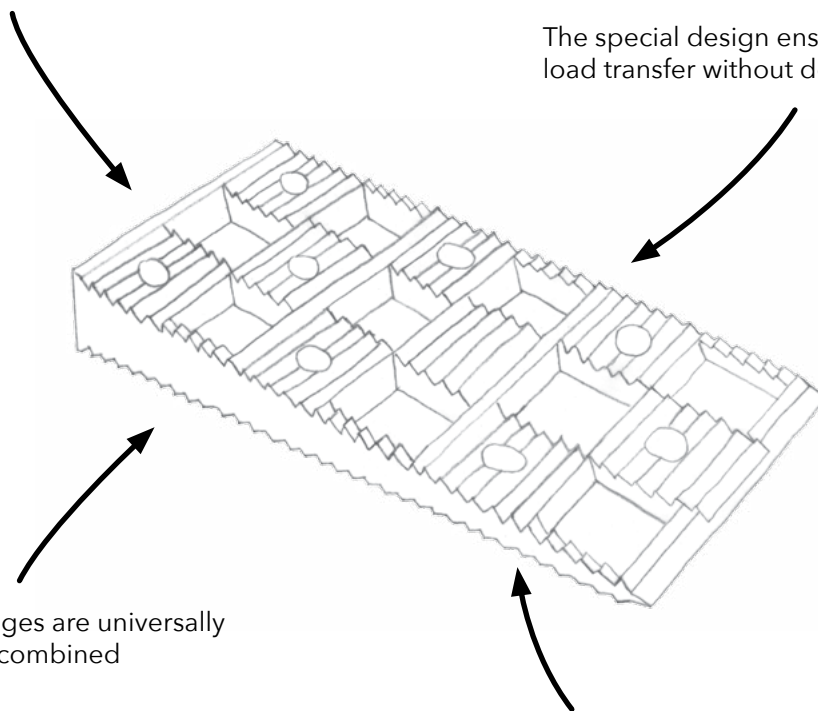

Multiple combinations and height compensation possible		Adjustment range using RELO	Adjustment range using WOOD width 45 mm
